

# About BAUDET

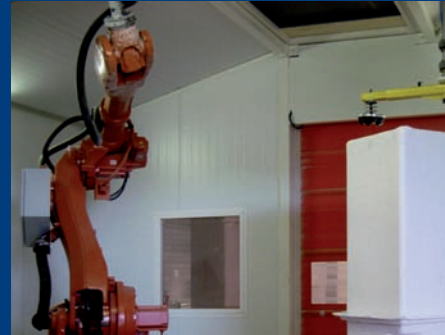

Head Office and manufacturing

Assembling and dispatching

## BAUDET figures ...

- Established :** 1992
- Turnover :** € 23 million
- Number of employees :** 200
- Market sectors :** new build & refurbishment, major projects and one off production
- Production capacity :** 12,000 units per year

Semi-automated production

Our extensive experience in the bathroom pod market has led Baudet to be one of the most innovative and experienced prefabricated bathroom suppliers in the world. Since Baudet Composites was established in 1992, more than 80,000 units have left our facility in Mouchamps in the Vendée.

We also take our environmental responsibilities very seriously. Baudet is fully committed to sustainable development and has been awarded the ISO 14001 for environmental management in recognition of our efforts.

Add to this the fact that the environmental impact of producing a pod is recognised to be much lower than traditional construction, you can be safe in the knowledge of your contribution toward this high profile issue.

## Offsite pods ...

Attractive, innovative, fully equipped, ready for connection. Standard product or bespoke design. Hygienic, durable, attractive. Cost effective and environmentally friendly.

With worldwide growth and success of Baudet Composites and its famous French brand Calypseau, the company rebranded and became BAUDET in 2007.

Baudet now boasts nearly 200 employees including highly qualified cad designers, research and development professionals and an extensive sales and after sales team. At each stage of production, we adopt a creative and innovative approach, and continuously look for new technology and developments for our clients.

# Baudet

Offsite pods ...  
... onsite solutions  
At the forefront of bathroom pod design.

From decades of experience gained at the forefront of luxury cruise liner fit out, Baudet transferred its technology to create a dedicated offsite bathroom production facility for the construction industry 30 years ago. Since then we have used the latest technology and innovation to develop and increase our ranges. We now supply many market sectors including universities, hospitals, care homes and hotels with our high quality, cost effective bathrooms. Our innovative approach has led us to become one of the world's leading suppliers of pods. More than 40 % of our sales are exported all over the world from our base in France.

### Mass production with bespoke capability

Our flexible approach to en-suite bathroom production means that you, the client, can tell us exactly what you need, and we will deliver by choosing from our wide range of colour schemes, materials and equipment. You can be assured that our designers will produce a truly unique and high quality product, just for you.

### Affordable solution

A Baudet pod not only gives you an affordable bathroom but with rapid installation times, less site personnel, factory level quality and strictly programmed deliveries you can see how an offsite pod can bring many economic factors to ensure your project is delivered on time, on budget.

100 % Watertight    Hygienic

Durable    Easy to install

## The Utility Range

This extensive range is both functional and highly economical, ideally suited to a variety of applications including university halls of residence, youth hostels, key worker accommodation, hostels and MOD residences.

Attractively designed and deceptively spacious, these bathroom units combine a durable composite structure, with easy installation saving on labour and maintenance costs. Available for new build and refurbishment.

Pyrite

Jaspe

Jade

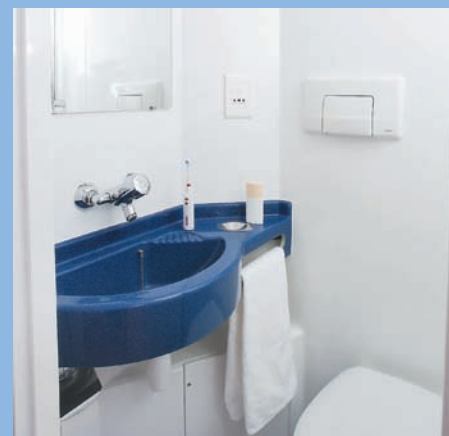

Onyx

Galène

Quartz

Perle

## Aigue-Marine

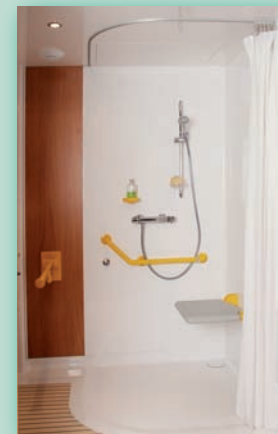

Azurite

## The Care Range

Specially designed for the care environment, our range is perfect for people with reduced mobility and wheel chair users. Ideal for healthcare applications, care homes, clinics, hospitals and retirement homes and in addition, where disabled units may be required in other accommodation.

All models have additional features including obstacle free non slip floors and can include shower seats and grab rails. With the added advantage of excellent hygiene properties, extremely easy to keep clean and maintain, these are a favourite for this demanding environment.

### Ormanite

Baudet provides bathroom pods that are practical, hygienic, durable and attractive.

### Emerite

### Citrine

## The Bespoke Range

A factory produced bathroom with a traditional construction look. Used across hotels of all star ratings, guest houses, apartments and even private homes. But mass production does not mean standardisation.

Combining composite structure with steel frame, choose from a range of finishes. You can create a unique style, modern or traditional, high-tech or contemporary.

Jaspe Plus

Anomia

Ballina

## Why choose Baudet ?

Several decades of experience in the shipping and construction industry has led Baudet to be a leading exponent in the design and supply of bathroom pods, ready for direct connection on site.

Whether for a luxury hotel or a youth hostel, we have experience of products that will suit your application. Tiles, stone, glass, marble, granite, wood, stainless steel, all products that allow you to create a bespoke solution to suit your style, budget and space.
